Torridon

Avalanche Hazard Forecast

Issued 07/03/2024

FOR PERIOD 18:00HRS Thu 07/03/2024 TO 18:00HRS Fri 08/03/2024

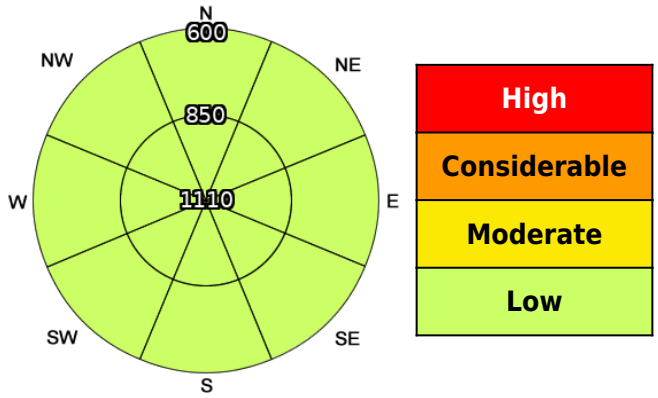
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Friday 08/03/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The old snow remnants will be firm and stable in all locations. Any remaining snow will generally be above 850 metres on North to Easterly aspects, primarily around coire rims and in gully lines. The avalanche hazard will be Low.



Forecast Weather Influences

No precipitation is forecast. Moderate East-South-Easterly winds will increase overnight to become strong. The freezing level will fall from above the summits to be around 600 metres.

Comments

Expected to stay dry for the next few days. However, it will feel cooler as the freezing level drops to around 600 metres. Remaining snow will be firm throughout.
