Avalanche Hazard Forecast

Issued 09/03/2024

FOR PERIOD 18:00HRS Sat 09/03/2024 TO 18:00HRS Sun 10/03/2024

THE AVALANCHE HAZARD WILL BE LOW

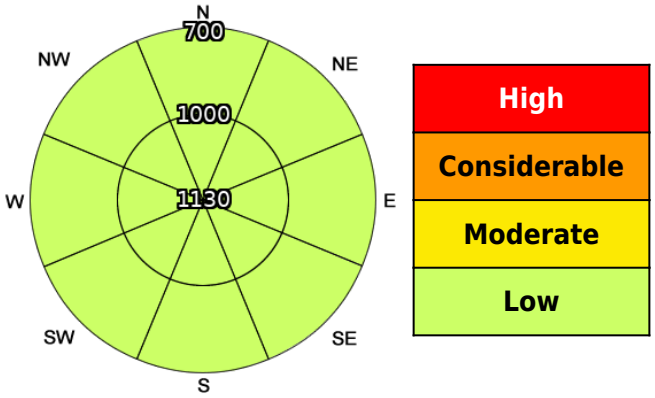
Avalanche Hazard Forecast for Sunday 10/03/2024

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Little change. Stability will remain very good in most locations. Some thin localised windslab will be present at the top of a few selected West to North-West aspects above 1000 metres. The avalanche hazard will be Low.



Forecast Weather Influences

Remaining cold. Moderate to strong East-South-Easterly winds. A few very light snow showers are possible in the afternoon.

Comments

Some localised windslab on selected W to NW aspects. Very good stability elsewhere.
