Glencoe

Avalanche Hazard Forecast

Issued 12/12/2021

FOR PERIOD 18:00HRS Sun 12/12/2021 TO 18:00HRS Mon 13/12/2021

THE AVALANCHE HAZARD WILL BE LOW

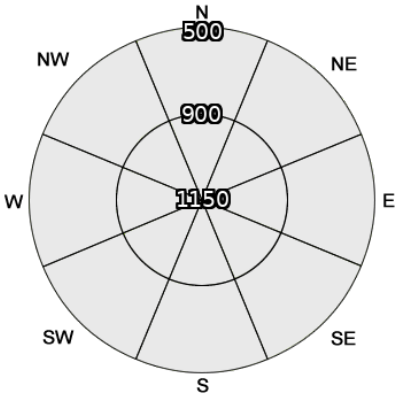
Avalanche Hazard Forecast for Monday 13/12/2021

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

The moist snowpack will consolidate as the freezing level lowers. New snow amounts are not expected to be significant, however shallow windslab will start to build in sheltered locations. These areas will tend to be localised with the tops of summit gullies and steep coire headwalls mainly affected on North to Easterly aspects above 900 metres. The avalanche hazard will be Low



Forecast Weather Influences

Sunday night, a short spell of mild air and some rain, then colder showery conditions during the early hours and persisting through Monday. The freezing will lower to around 650 metres in the early part of Monday with light snow showers. Winds will be strong mainly from a South-Westerly direction.

Comments

Getting colder on Monday.
