Issued 09/03/2024

FOR PERIOD 18:00HRS Sat 09/03/2024 TO 18:00HRS Sun 10/03/2024

THE AVALANCHE HAZARD WILL BE LOW

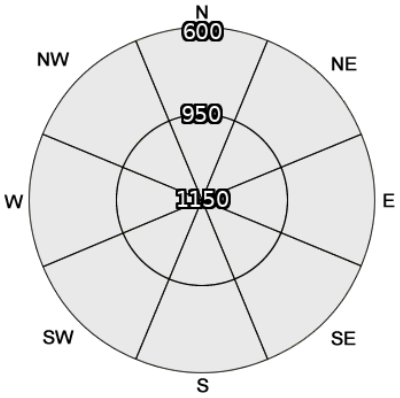
Avalanche Hazard Forecast for Sunday 10/03/2024

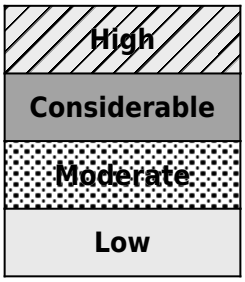
Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

The vast majority of the snow will be well bonded and stable. Isolated areas of less well bonded snow will be present in wind sheltered locations on mainly West to North aspects above 900 metres. Gully tops and sharply defined corrie rims are the most likely locations for these deposits. The avalanche hazard will be Low.





Forecast Weather Influences

Very light precipitation throughout the period, will fall as snow above 700 metres. Winds will be strong Easterly overnight, veering East-South-Easterly by late morning. Freezing level around 700 metres.

Comments

Full winter conditions above 850 metres. Firm and icy underfoot in places.
