Avalanche Hazard Forecast

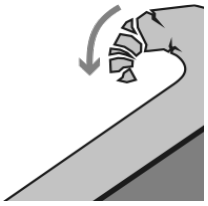
FOR PERIOD 18:00HRS Mon 11/03/2024 TO 18:00HRS Tue 12/03/2024

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 12/03/2024

Avalanche Problems

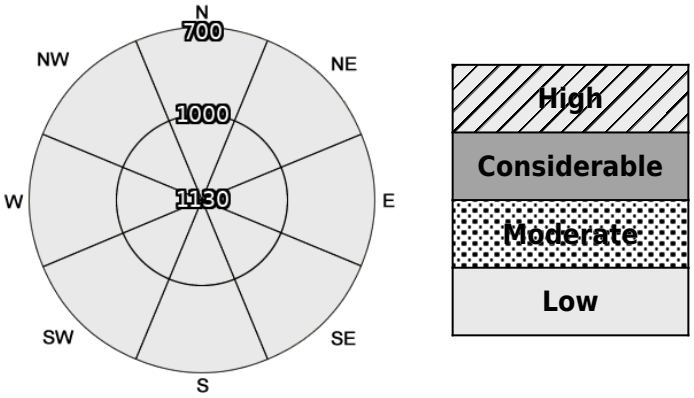
Wind Slab



Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will be generally firm and stable throughout, with the snow surface softening during the day. Overnight, shallow and isolated pockets of windslab will develop on West to North aspects above 1000 metres, mainly around coire rims and gully tops. These deposits will stabilise throughout the day. Existing cornices will become increasingly unstable. The avalanche hazard will be Low.



Forecast Weather Influences

Overnight the freezing level will hover just below the summits, rising to well above the summits throughout the day. Light summit snow is expected during the evening. Moderate South-Easterly winds overnight, increasing to strong during the daytime.

Comments

Some snow loss to be expected tomorrow as the freezing level rises to well above the summits.
