Avalanche Hazard Forecast

Issued 13/03/2024

FOR PERIOD 18:00HRS Wed 13/03/2024 TO 18:00HRS Thu 14/03/2024

THE AVALANCHE HAZARD WILL BE LOW

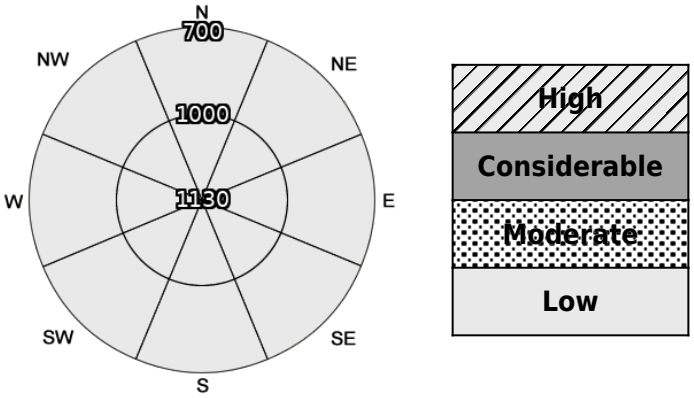
Avalanche Hazard Forecast for Thursday 14/03/2024

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

New moderately bonded windslab expected on West through North to East aspects above 1000 metres. Accumulations are not expected to be extensive and will be confined to the top of steep gullies and sharp edged coire rims. The snowpack at lower elevations will remain moist or crusty and well bonded. The avalanche hazard will be Low.



Forecast Weather Influences

Some light showers of sleety snow for a time overnight and again later in the day. Freezing just below summit level. Strong West-South-West winds easing and becoming light Easterly during the morning.

Comments

New windslab not expected to be extensive and limited to near summit areas.
