Torridon

Avalanche Hazard Forecast

Issued 12/01/2022

FOR PERIOD 18:00HRS Wed 12/01/2022 TO 18:00HRS Thu 13/01/2022

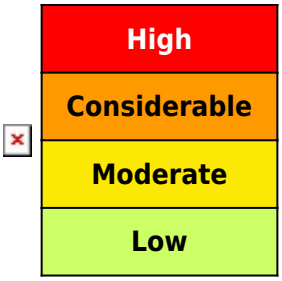
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 13/01/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change. The fragmented wet snowpack will continue to thaw at all levels and will have good stability throughout. Most snow will remain on high North to East aspects, on ridge flanks, round coire rims and in gullies and runnels. Elsewhere, it will be patchy with little snow below 600 metres. The avalanche hazard will be Low.



Forecast Weather Influences

The mild, moist and strong South-West airflow will persist throughout the period with summit gales and patchy light rain at all levels. The freezing level will be well above the summits.

Comments

Expect little change in the weather and snowpack for tomorrow and Friday, although winds lighter and a tad drier on Friday.
