Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Sun 17/03/2024 TO 18:00HRS Mon 18/03/2024

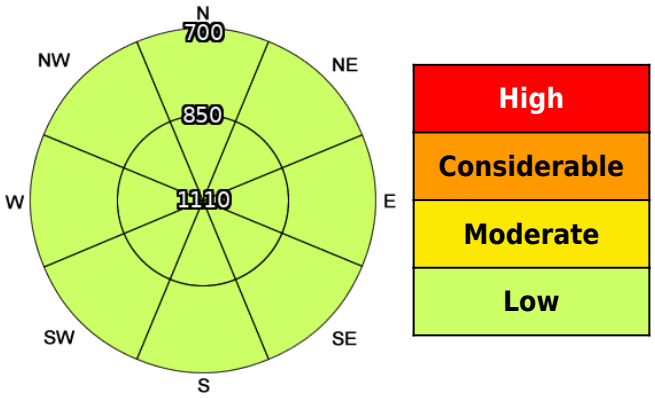
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 18/03/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change expected. The limited snow cover will continue to slowly thaw at all levels and stability will generally be good throughout. The more recent snow will remain soft and moist with superficial cover above 700 metres. The old snow will generally be firm below a softening surface layer. There will be very little snow on the coastal mountains. The avalanche hazard will be Low.



Forecast Weather Influences

Patchy overnight rain at all levels will ease to give a largely dry day. Light rain possibly returning to the coastal hills late afternoon. Fresh Southerly winds initially will gradually strengthen, with summit gales likely by the end of the period. The freezing level will be near, or above the highest summits.

Comments

Remaining unsettled. Generally mild and windy over the next couple days. Colder later, but only small amounts of precipitation expected.
