

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 26/02/2022

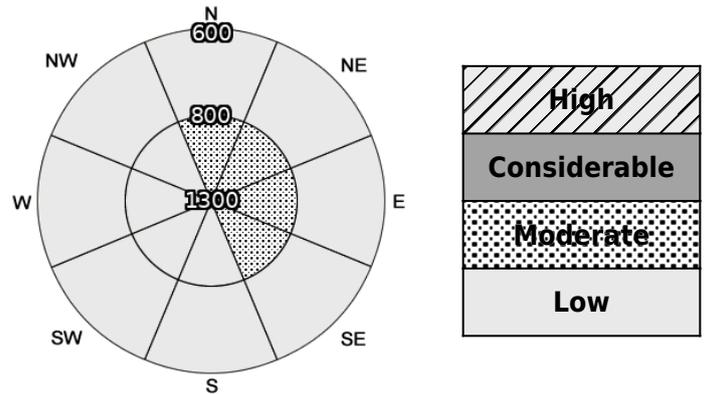

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

The snowpack will slowly consolidate in the milder conditions. However, instabilities will remain, these mainly on wind sheltered Northerly through East to South-East aspects above 800 metres. Below this level the moist snowpack will slowly thaw and stability will be better. Windward aspects will remain icy and stable. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will be a mild day with the freezing level around the summits. It will be generally dry. Gale to storm force winds will be from the South-South-West.

Comments

Exposed windward locations at higher levels very hard and icy.
