Torridon

Avalanche Hazard Forecast

Issued 20/03/2024

FOR PERIOD 18:00HRS Wed 20/03/2024 TO 18:00HRS Thu 21/03/2024

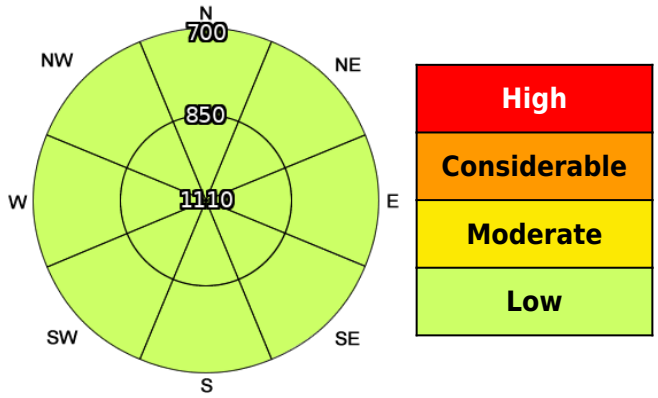
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 21/03/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The limited patchy snow cover will continue to thaw and diminish, stability will be good in all locations. Largest areas of snow will linger on North to East aspects above 850 metres, predominately on more inland mountains. There will be many bare slopes, ridges and summits throughout the forecast area. The avalanche hazard will be Low.



Forecast Weather Influences

A warm, wet and windy morning, followed by drier but still very windy conditions in the afternoon. Winds will be storm force South-Westerly. The freezing level will be well above the summits for most of the day falling to around 1000 metres by the end of the afternoon.

Comments

A return to more wintry conditions is forecast from Friday.
