Avalanche Hazard Forecast

Issued 21/03/2024

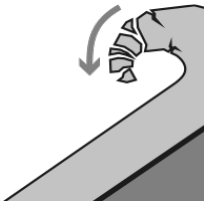
FOR PERIOD 18:00HRS Thu 21/03/2024 TO 18:00HRS Fri 22/03/2024

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Friday 22/03/2024

Avalanche Problems

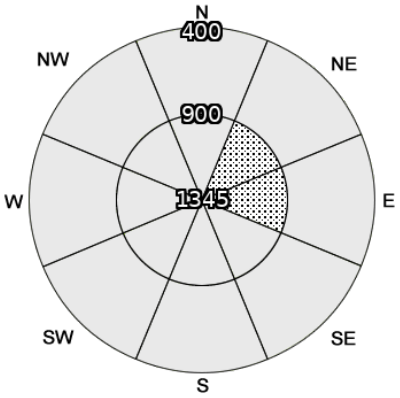
Wind Slab

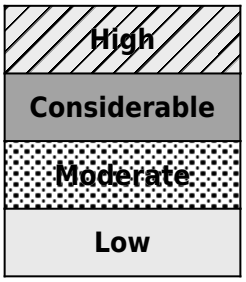


Cornices

Forecast Snow Stability & Avalanche Hazard

Increasing hazard through the period as accumulations of
fresh unstable windslab gain depth, mainly on North-East and East aspects above 900 metres. Features such as corrie rims, gullies and ridge flanks will be most affected. Fragile cornices will build above these aspects. Windward aspects will be scoured and stable. The avalanche hazard will be Moderate.





Forecast Weather Influences

There will be gale force West-South-Westerly winds and snow showers. The freezing level will drop to around 600 metres by dawn and remain there through the day.

Comments

Cooler conditions forecast to continue through the weekend.
