Torridon

Avalanche Hazard Forecast

Issued 01/03/2022

FOR PERIOD 18:00HRS Tue 01/03/2022 TO 18:00HRS Wed 02/03/2022

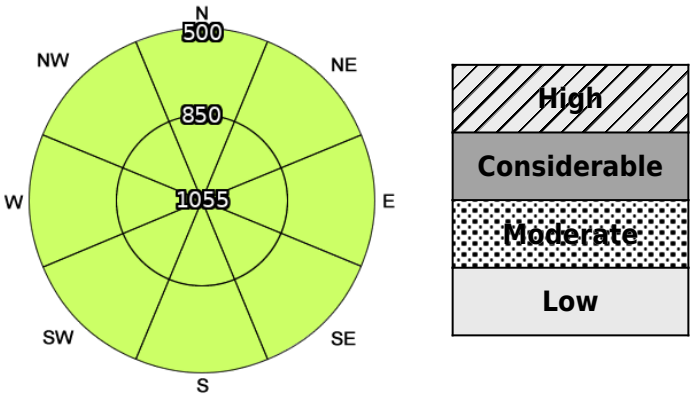

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Wednesday 02/03/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will remain stable. Aspects exposed to the sun will soften as the day progresses with shaded aspects remaining firm. The avalanche hazard will be Low.

Forecast Weather Influences

It will be dry with South-Easterly winds throughout the forecast period. Overnight winds will be light with the freezing level around 600 metres. The day will be sunny with winds increasing to gale force at higher elevations by the end of the day as summit temperatures reach plus 1 celsius.

Comments

A firm surface crust is widespread but not weight bearing everywhere! Snow expected to remain firm on shaded aspects during Wednesday.
