Southern Cairngorms

Avalanche Hazard Forecast

Issued 31/03/2024

FOR PERIOD 18:00HRS Sun 31/03/2024 TO 18:00HRS Mon 01/04/2024

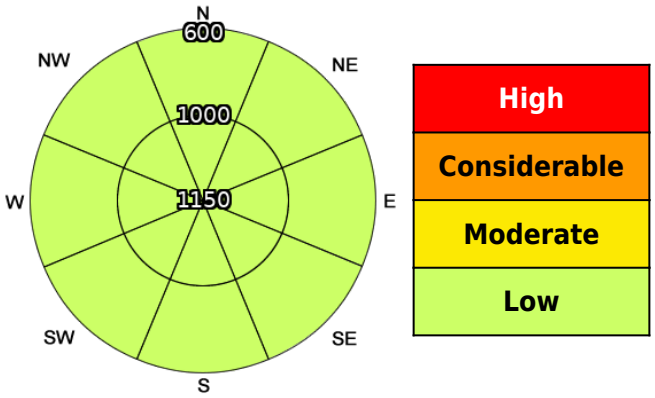
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 01/04/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snow will continue to slowly thaw at lower elevations. Snow on the higher summits will develop firmer surface layers in the sub-zero temperatures. Stability will be good throughout. Good cover will be found above 900 metres on the higher mountains. Only small patches below this altitude. The avalanche hazard will be Low.



Forecast Weather Influences

No precipitation. Moderate Easterly winds will back slowly overnight, increasing in strength to become strong North-Easterly during the day. The freezing level will remain just above the summits, lowering to 1200 metres at the end of the period, however a sub-zero layer will form with summit temperatures falling below freezing.

Comments

Turning slightly cooler on Tuesday.
