Avalanche Hazard Forecast

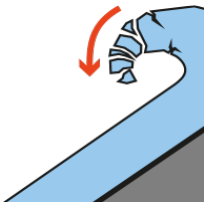
Issued 06/04/2024

FOR PERIOD 18:00HRS Sat 06/04/2024 TO 18:00HRS Sun 07/04/2024

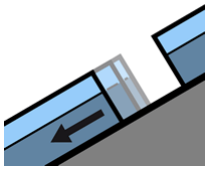
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 07/04/2024

Avalanche Problems



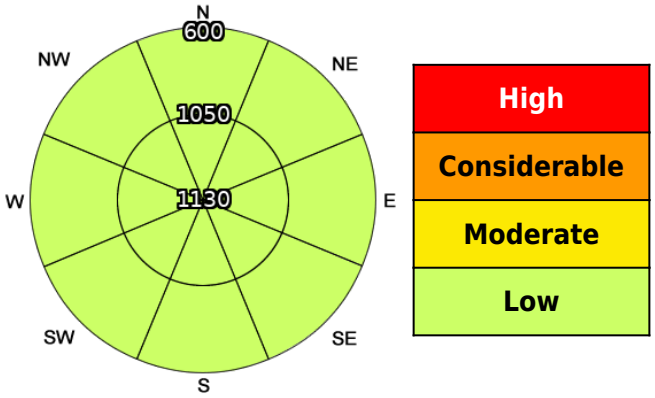
Cornices



Gliding Snow

Forecast Snow Stability & Avalanche Hazard

Some moist new windslab but only on very sheltered steep North To East aspects above 1050m. Any new accumulations expected to be thin and localised. The remainder of the old snowpack will remain moist and generally well stabilised. Falling ice and rocks residual hazards in the thaw. Potential for minor full depth snow slides from steep crags in Coire Ardair. The avalanche hazard will be Low.



Forecast Weather Influences

Overnight rain then showers of wet, sleety snow over summits. Freezing level falling from 1400m overnight to 1050m during the day. Very strong South-South-Westerly winds.

Comments

Some potential for falling ice, rocks, and minor full depth snow slides in vicinity of Post Face of Coire Ardair.
