Avalanche Hazard Forecast

Issued 07/04/2024

FOR PERIOD 18:00HRS Sun 07/04/2024 TO 18:00HRS Mon 08/04/2024

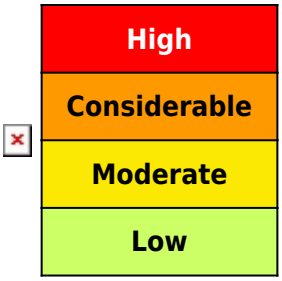
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 08/04/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will remain stable and well bonded. There will be some very small accumulations of fresh snow overnight on North-East aspects above 900 metres. These will not be significant. The avalanche hazard will be Low.



Forecast Weather Influences

There will be some very light precipitation this evening, and overnight, falling as snow above 900 metres. Monday will be mainly dry. Freezing level will be around 950 metres initially, rising to 1100 metres by early afternoon. Winds will remain South-Westerly and ease from storm force, overnight, to moderate by Monday afternoon.

Comments

The remaining snowpack, which has recently been saturated, will gain a little firmness and continue to consolidate. A less windy day Monday, with winds easing throughout the daylight hours.
