Issued 07/04/2024

FOR PERIOD 18:00HRS Sun 07/04/2024 TO 18:00HRS Mon 08/04/2024

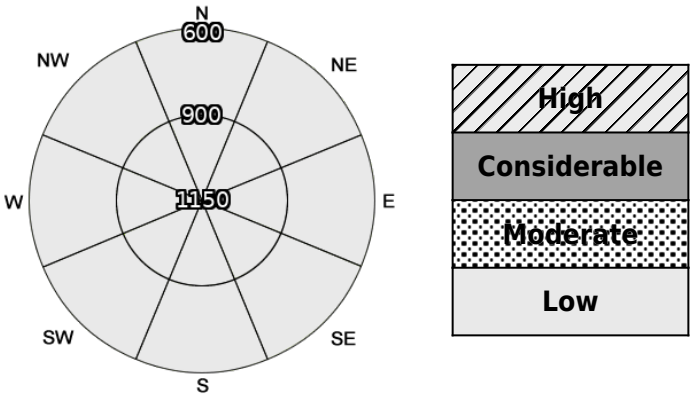
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 08/04/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The remaining snow will be well bonded and stable on all aspects and at all altitudes. Largest areas will be found above 900 metres, especially on West through North to East aspects. The avalanche hazard will be Low.



Forecast Weather Influences

A trace of snow above 1000 metres this evening, followed by a dry day. Gale force South-Westerly winds overnight will gradually ease to eventually become moderate Southerlies by the very end of the afternoon. Freezing level lowering briefly to 900 metres around daybreak, climbing once again to reach 1300 metres by early afternoon.

Comments

Brief respite from the wind tomorrow as it decreases through the day.
