Avalanche Hazard Forecast

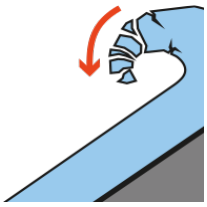
Issued 10/04/2024

FOR PERIOD 18:00HRS Wed 10/04/2024 TO 18:00HRS Thu 11/04/2024

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 11/04/2024

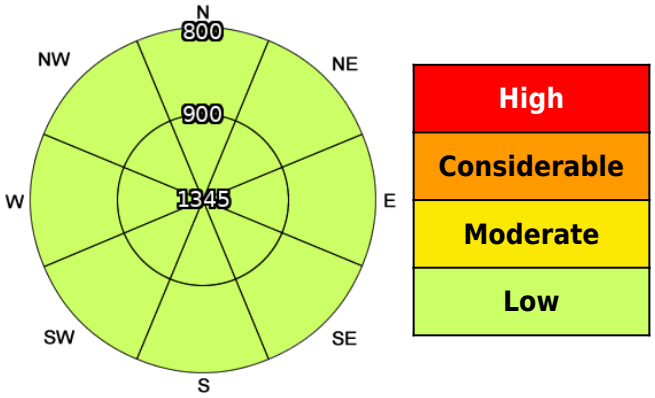
Avalanche Problems



Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to thaw and consolidate. The greatest deposits will remain on high North to East facing corries. Stability will remain generally good all over. However, any remaining sections of cornices will be prone to collapse. The avalanche hazard will be Low.



Forecast Weather Influences

Overnight rain will peter out to leave a cloudy but generally dry day. The freezing level will drop from 2000 metres overnight to be around 1400 metres during the day. Gale force winds will be from the South-West.

Comments

Forecast to remain mild until at least the weekend.
