Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Fri 05/02/2010 TO 18:00HRS Sat 06/02/2010

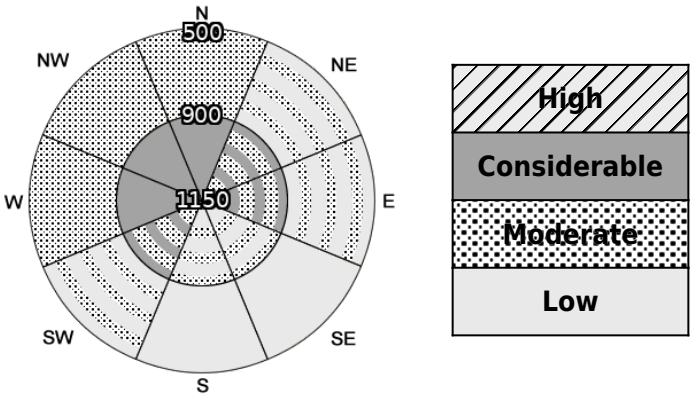
THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Saturday 06/02/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Fluctuating temperatures will aid the consolidation process of much of the snowpack but moderate to weakly bonded soft windslab will exist in sheltered areas such as gullies and also on slopes with a West to North-Easterly aspect mainly above 900 metres. Steep scarp slopes, corniced areas and sheltered gully exits will be most affected. The avalanche hazard will be Considerable.



Forecast Weather Influences

There will be light snow showers with fresh Easterly winds. The freezing level will be 800 metres.

Comments

Patchy light snow overnight becoming mainly dry on Saturday.
