Torridon

Avalanche Hazard Forecast

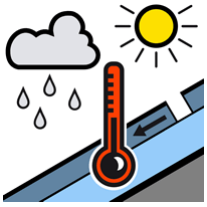

Issued 06/03/2022

FOR PERIOD 18:00HRS Sun 06/03/2022 TO 18:00HRS Mon 07/03/2022

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 07/03/2022

Avalanche Problems

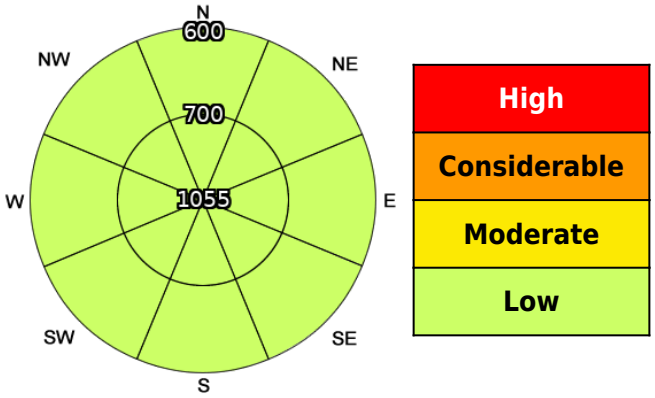

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will remain firm and stable throughout with greatest amounts remaining on North through East to South-East aspects above 750 metres. Where exposed to direct sunlight, the snowpack will continue to soften. Remaining cornices will continue to slump. The avalanche hazard will be Low.

Forecast Weather Influences

It will remain dry. Winds will be strong South-West overnight easing to fresh during daylight hours backing to become Southerly by late afternoon. The freezing level will be above the summits although inversion conditions will maintain cooler temperatures to lower levels.

Comments

Feeling very spring like in the direct sun but noticeably cooler when exposed to the wind.
