Glencoe

Avalanche Hazard Forecast

Issued 22/12/2019

FOR PERIOD 18:00HRS Sun 22/12/2019 TO 18:00HRS Mon 23/12/2019

THE AVALANCHE HAZARD WILL BE LOW

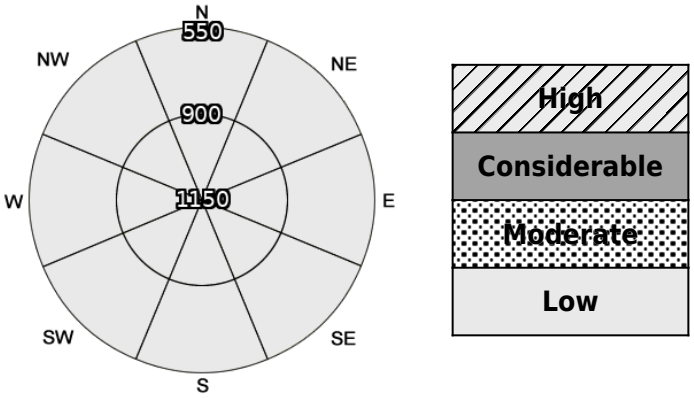
Avalanche Hazard Forecast for Monday 23/12/2019

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

The old snowpack will remain generally well bonded. New snow accumulations are not expected to be extensive. However, localised areas of shallow windslab will start to develop mainly in steep sheltered locations notably gully tops and corrie headwalls on North-West through North to East aspects above 900 metres. The avalanche hazard will be Low.



Forecast Weather Influences

The freezing level will be around 1000 metres, showers some falling as snow and mainly above 900 metres. Winds will be moderate to fresh from a Southerly direction.

Comments

The snowpack will remain firm and generally frozen softening in the afternoon.
