Glencoe

Avalanche Hazard Forecast

Issued 01/01/2020

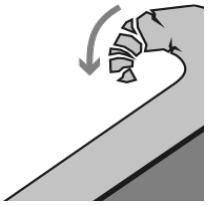
FOR PERIOD 18:00HRS Wed 01/01/2020 TO 18:00HRS Thu 02/01/2020

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 02/01/2020

Avalanche Problems

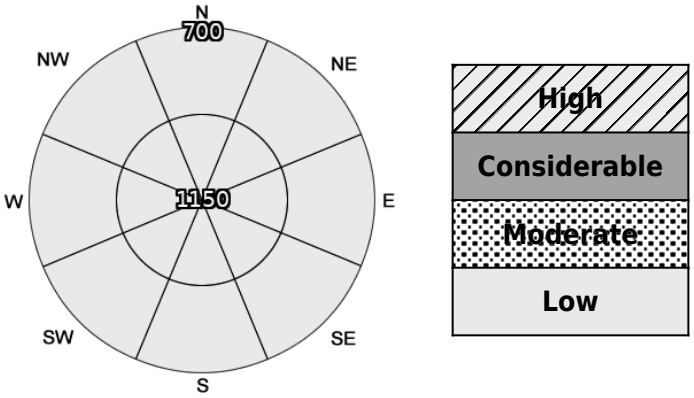
Wind Slab



Cornices

Forecast Snow Stability & Avalanche Hazard

The existing snowpack will remain generally well bonded and stable. Fresh unstable windslab may develop during the day mainly on North and North-East aspects above 1100 metres. Any accumulations will be localised and mainly found in gully exits and around corrie rims. Fragile cornices will form above these aspects. The avalanche hazard will be Low.



Forecast Weather Influences

Very strong South-South-Westerly winds. Dry overnight followed by rain at most levels during the day with snow only on the highest summits. The freezing level will be just above the summits.

Comments

Fresh windslab only expected on very highest summits in Glencoe, otherwise wet snow or rain.
