Glencoe

Avalanche Hazard Forecast

Issued 03/01/2020

FOR PERIOD 18:00HRS Fri 03/01/2020 TO 18:00HRS Sat 04/01/2020

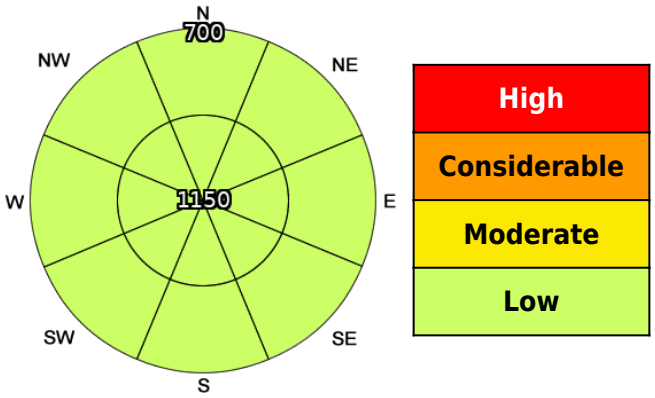
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 04/01/2020

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Localised surface instabilities will be present mainly on North-East to South-East aspects above 900 metres in wind sheltered locations where recent snow has accumulated. The older snowpack will remain well bonded and stable. The avalanche hazard will be Low.



Forecast Weather Influences

Strong Westerly winds overnight becoming moderate by dawn and then backing West-South-Westerly. Showers, falling as snow on the summits overnight will turn to rain during the day. The freezing level will rise above the summits overnight and remain there.

Comments

Unsettled conditions for the next few days.
