Glencoe

Avalanche Hazard Forecast

Issued 16/12/2021

FOR PERIOD 18:00HRS Thu 16/12/2021 TO 18:00HRS Fri 17/12/2021

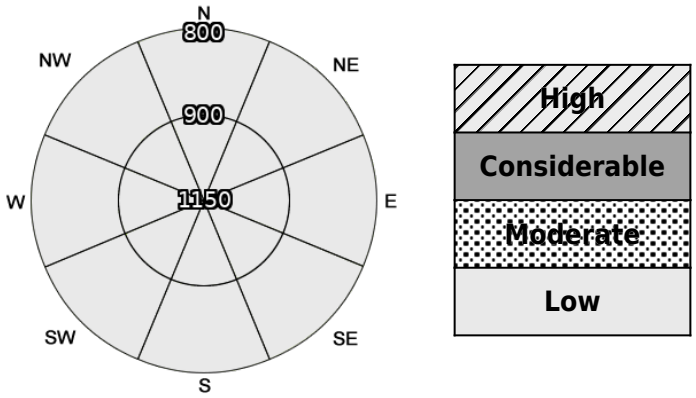
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Friday 17/12/2021

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will generally be soft and moist with good stability in most locations, isolated shallow surface instabilities will remain a possibility on the very steepest slopes but these will mainly be avoidable. The avalanche hazard will be Low.



Forecast Weather Influences

It will be dry, mild and generally settled with light variable winds. The freezing level will be around 3000 metres but temperature inversion conditions will give lower temperatures in the glen than on the summits.

Comments

Remaining mild.
