Glencoe

Avalanche Hazard Forecast

Issued 17/12/2021

FOR PERIOD 18:00HRS Fri 17/12/2021 TO 18:00HRS Sat 18/12/2021

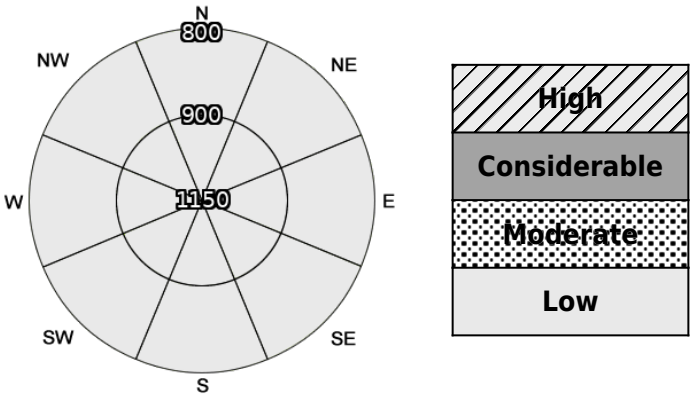
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 18/12/2021

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will generally be soft and moist with good stability in most locations, isolated shallow surface instabilities will remain a possibility on the very steepest slopes but these will be localised and avoidable. The avalanche hazard will be Low.



Forecast Weather Influences

Staying dry with light South-Westerly winds. A ridge of high pressure will persist across the area, this will gradually strengthen the inversion, which in turn allows temperatures across summits to lift higher than at low levels. Freezing level at around 3000 metres.

Comments

Remaining dry and mild with a temperature inversion.
