Torridon

Avalanche Hazard Forecast

Issued 02/01/2022

FOR PERIOD 18:00HRS Sun 02/01/2022 TO 18:00HRS Mon 03/01/2022

THE AVALANCHE HAZARD WILL BE LOW

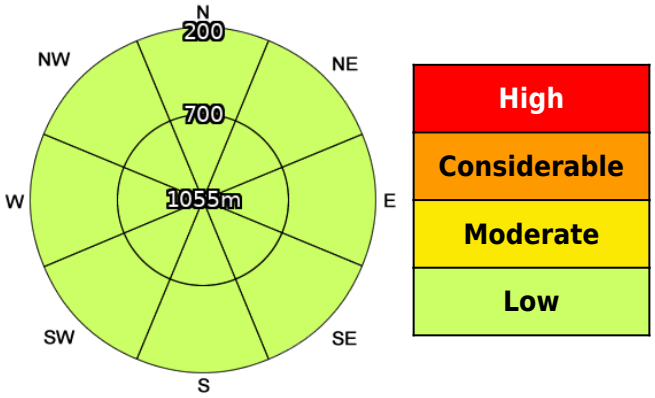
Avalanche Hazard Forecast for Monday 03/01/2022

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

New snow quantities are not expected to be significant. Some isolated areas of moderately well bonded windslab may be present on steep South-East to South aspects above 700 metres. Greatest amounts will be found around corrie rims and other steep wind sheltered locations. The old snow patches will be stable. The avalanche hazard will be Low.



Forecast Weather Influences

Strong South-Westerly winds ease during the evening and back to the North-West remaining fresh. Initially falling as rain this will turn to snow during the early hours and will reach all levels by mid-day. The freezing level will lower to 200m.

Comments

A return to colder conditions.
