Avalanche Hazard Forecast

Issued 14/03/2022

FOR PERIOD 18:00HRS Mon 14/03/2022 TO 18:00HRS Tue 15/03/2022

THE AVALANCHE HAZARD WILL BE MODERATE

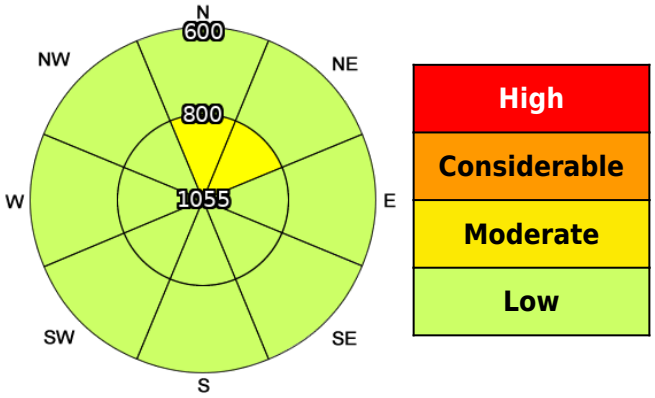
Avalanche Hazard Forecast for Tuesday 15/03/2022

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Localised accumulations of fresh unstable windslab will develop in wind sheltered locations, mainly on North and North-East aspects above 800 metres. This will mostly effect the more coastal mountains in the afternoon with less snow expected further inland. The older snowpack will remain generally well bonded and stable. The avalanche hazard will be Moderate.



Forecast Weather Influences

Moderate West-South-West winds initially soon become strong and back South-South-Westerly. Showers, falling as snow above around 600 metres, will be heaviest in the West of the area in the afternoon. The freezing level will drop to around 700 metres overnight, rising slightly through the day.
