Southern Cairngorms

Avalanche Hazard Forecast

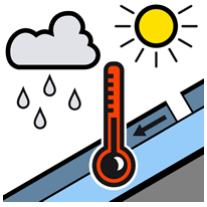

Issued 18/03/2022

FOR PERIOD 18:00HRS Fri 18/03/2022 TO 18:00HRS Sat 19/03/2022

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 19/03/2022

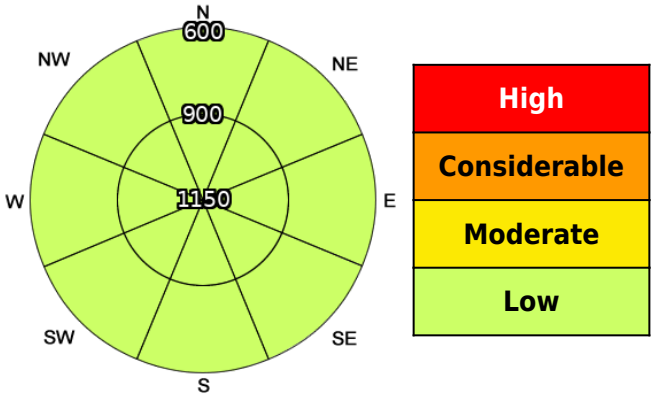

Avalanche Problems

Wet Snow

Forecast Snow Stability & Avalanche Hazard

The majority of the old snow will remain well bonded and stable. Surface instabilities will be possible on sun affected slopes and also where softer deposits persist in steep sheltered terrain. This is likely around corrie rims and in gully tops on North to East aspects above 1000 metres. The avalanche hazard will be Low.

Forecast Weather Influences

A dry and sunny day is expected. The freezing level will be above the summits. Gale force winds, Southerly at dawn, South-East in the afternoon.

Comments

A bright day but remaining windy. Full Winter conditions above 900 metres, often icy underfoot.
