Avalanche Hazard Forecast

Issued 21/03/2022

FOR PERIOD 18:00HRS Mon 21/03/2022 TO 18:00HRS Tue 22/03/2022

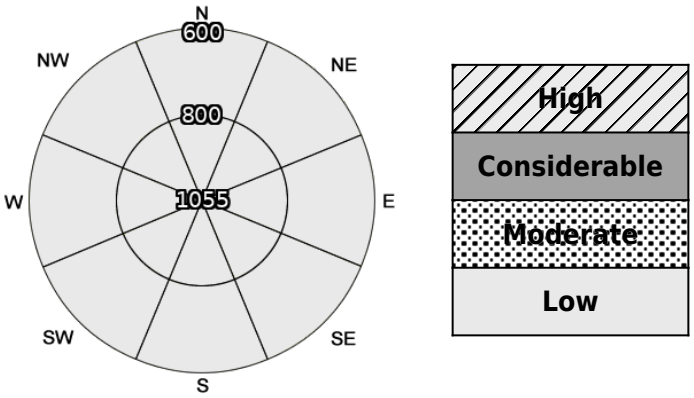

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 22/03/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change. The snowpack will be well bonded and stable throughout, very firm on shaded aspects with surface softening on sunny aspects. Limited snow cover generally with most snow remaining on North through East to South-East aspects above 800 metres. Many areas will be bare. The avalanche hazard will be Low.

Forecast Weather Influences

High pressure will maintain dry and settled conditions throughout, with long spells of sunshine. Light South-East to South winds will freshen during the day, moderating again later. The freezing level will be well above the summits.

Comments

Settled weather and conditions expected throughout the week. Be prepared for high UV levels. Widespread neve exists, especially on shaded aspects at higher elevations.
