Southern Cairngorms

Avalanche Hazard Forecast

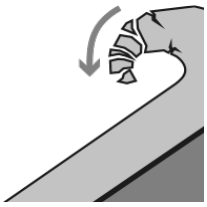

Issued 21/03/2022

FOR PERIOD 18:00HRS Mon 21/03/2022 TO 18:00HRS Tue 22/03/2022

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 22/03/2022

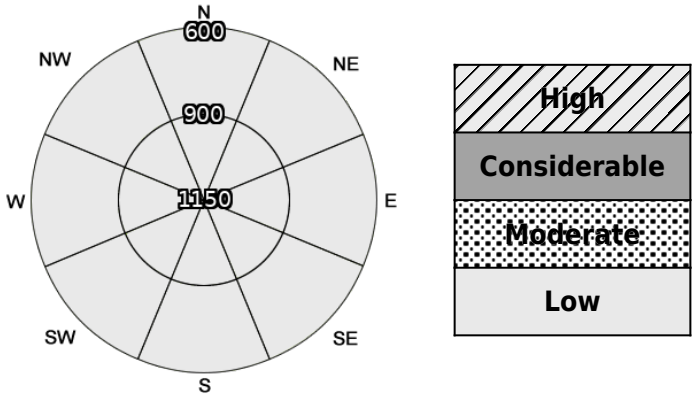

Avalanche Problems

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to soften and thaw at all levels. Overall the snow will remain well bonded but surface instabilities are possible on any steep slope, particularly where exposed to the sun. Any remaining cornices will be prone to collapse. Snow cover will be very patchy below 900 metres with most cover being encountered on the highest mountains of the main Cairngorm Plateau. The avalanche hazard will be Low.

Forecast Weather Influences

Remaining dry with the freezing level above the summits. Fresh winds from the South-South-East are expected.

Comments

Remaining icefall and cornice remnants will be prone to collapse.
