

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Wednesday 23/03/2022

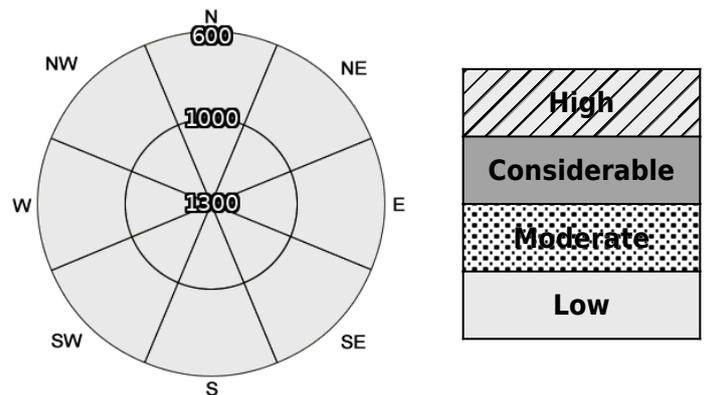

Avalanche Problems

Cornices

Forecast Snow Stability & Avalanche Hazard

The spring snowpack will continue to thaw and consolidate. Some surface wet snow instabilities will exist on steep slopes exposed to the full strength of the sun, particularly during the afternoon. Any remaining sections of cornice will be prone to collapse. The avalanche hazard will be Low.

Forecast Weather Influences

Little change is expected in the weather. It will remain dry and mild with long sunny periods during the day. The freezing level will be above the summits. Moderate winds will be from the South.

Comments

Ice falling off crags a hazard in the mild conditions.
