Torridon

Avalanche Hazard Forecast

Issued 26/03/2022

FOR PERIOD 18:00HRS Sat 26/03/2022 TO 18:00HRS Sun 27/03/2022

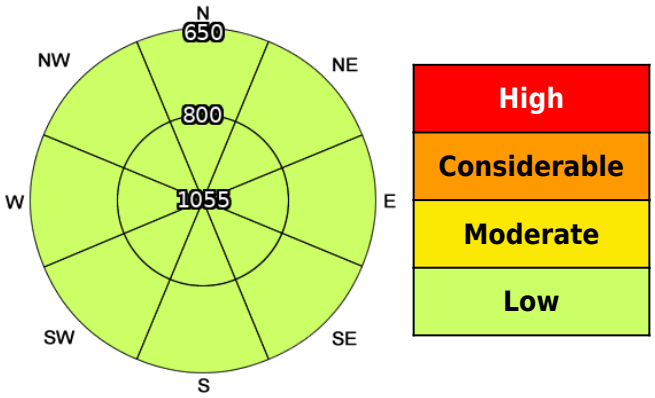
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 27/03/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

There will be little change. The slowly thawing snowpack will remain generally well bonded and stable throughout. Most snow lingers on North through East to South-East aspects, mainly above 800 metres. Patchy cover elsewhere and many areas and summit slopes will be bare. The avalanche hazard will be Low.



Forecast Weather Influences

High pressure will keep conditions dry and settled with good periods of sunshine. There will be a light to moderate breeze, gradually veering from South to West through the forecast period. The freezing level will remain above the summits.

Comments

High UV levels forecast for tomorrow due to good periods of sunshine. However, it will feel cool on the summits.
