Avalanche Hazard Forecast

Issued 01/04/2022

FOR PERIOD 18:00HRS Fri 01/04/2022 TO 18:00HRS Sat 02/04/2022

THE AVALANCHE HAZARD WILL BE LOW

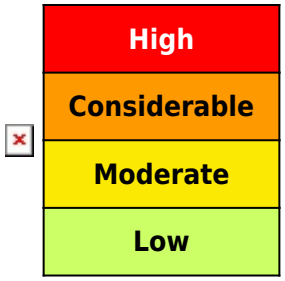
Avalanche Hazard Forecast for Saturday 02/04/2022

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

A light covering of new snow will persist on most aspects above 500 metres. Isolated pockets of windslab will exist on steep North through East to South-East aspects, mainly above 700 metres. In some locations, this will be overlying firm old snow, but in general, it will be shallow, soft and avoidable. The old snow will be well bonded and stable. The avalanche hazard will be Low.



Forecast Weather Influences

Scattered snow showers overnight will peter out to give a largely dry and bright day with some sunny periods and light Northerly winds. The freezing level will peak at 800 metres in the afternoon, rising from 400 metres overnight.

Comments

A brief dry spell tomorrow and Sunday morning, but turning mild and unsettled thereafter.
