

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 04/04/2022

Avalanche Problems

Persistent Weak Layers

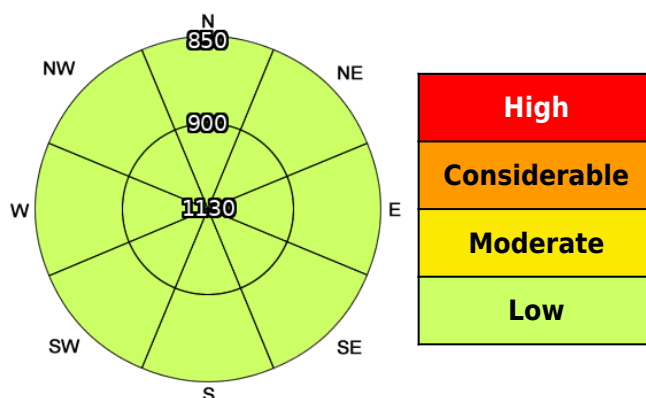

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

Some minor wet snow instability overnight on steep North to East aspects above 900 metres. The patchy older snowpack will become moist but remain well bonded. Residual old cornices will weaken. The avalanche hazard will be Low.

Forecast Weather Influences

Wet and mild at all elevations overnight and throughout the morning. A little cooler later. Strong West-North-Westerly airflow.

Comments

Depletion of the older snowpack expected in the mild and wet conditions.
