THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Friday 08/04/2022

Avalanche Problems

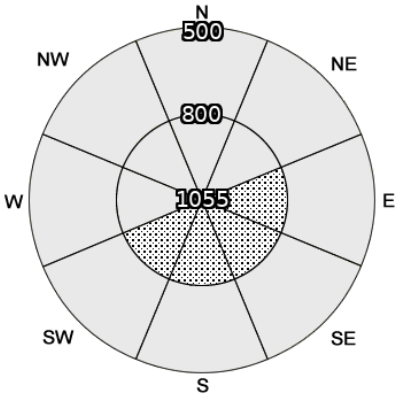

Wind Slab

Cornices

Forecast Snow Stability & Avalanche Hazard

Fresh unstable windslab will be deposited in wind-sheltered areas throughout the forecast period. Greatest accumulations will be on East through South to South-West aspects above 800 metres. Fragile cornices will build above these aspects. The old snowpack will be re-frozen and stable. The avalanche hazard will be Moderate.

Forecast Weather Influences

Winds will be strong generally North-North-Westerly throughout the forecast period. Showers are expected throughout the period, falling as snow above 300-400 metres.

Comments

There is a risk of thunder and lightning.
