

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 05/02/2023

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The greatest snow deposits will remain on North to East aspects above 800 metres. The snowpack will be hard, icy and frozen. Fresh deposits from Saturday afternoon are shallow and not significant. Stability will be good throughout. The avalanche hazard will be Low.

Forecast Weather Influences

After an overnight frost a clear settled day with spells of sunshine is expected. Moderate Westerly winds will back to become Southerly.

Comments

A bit of a driech day on Saturday, a much brighter day expected on Sunday before cloudy conditions return on Monday.
