

**THE AVALANCHE HAZARD WILL BE MODERATE**

**Avalanche Hazard Forecast for Thursday 09/02/2023**

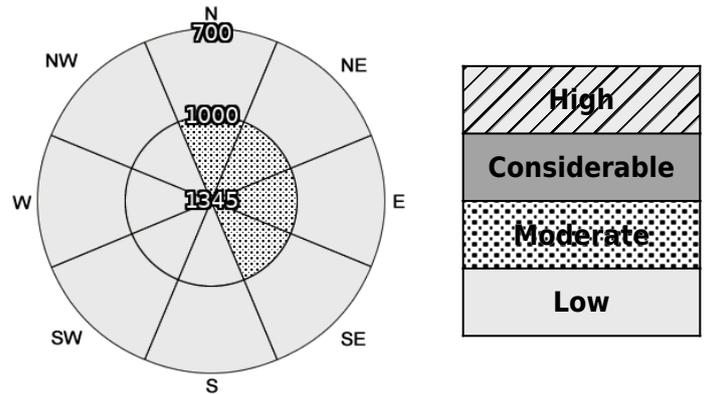

**Avalanche Problems**

Wind Slab

**Forecast Snow Stability & Avalanche Hazard**

The existing snowpack will freeze and consolidate. Fresh areas of windslab will be deposited in locations sheltered from the strong winds. These areas will not be particularly extensive or deep. Most affected will be corrie rims and the tops of gullies on North through East to South-East aspects above 1000 metres. The avalanche hazard will be Moderate.

**Forecast Weather Influences**

Snow showers overnight will ease through the day and turn to rain below 600 metres as the freezing level creeps up to around 800 metres by the end of the afternoon. Gale force South-Westerly winds will veer to the West.

**Comments**

Existing snowpack will be very hard and icy on Thursday. Milder conditions expected to return during Friday.
