Avalanche Hazard Forecast

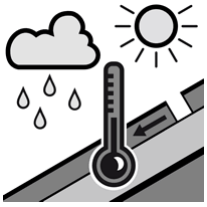
Issued 20/02/2023

FOR PERIOD 18:00HRS Mon 20/02/2023 TO 18:00HRS Tue 21/02/2023

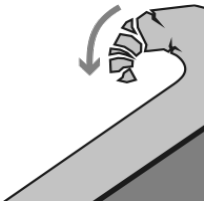
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 21/02/2023

Avalanche Problems



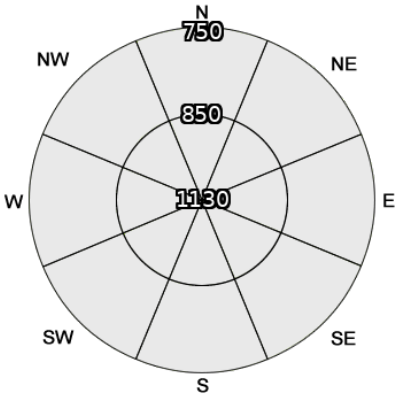
Wet Snow

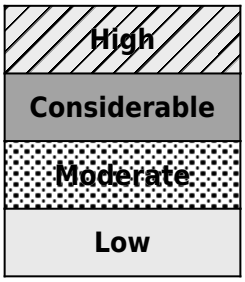


Cornices

Forecast Snow Stability & Avalanche Hazard

Little change is expected. The remaining snowpack will be moist, well consolidated and generally stable in all locations. Greatest snow cover will be on North through East to South-East aspects above 850m. Thaw conditions will continue throughout the forecasting period and further snow loss is expected. Any remaining cornices will be prone to collapse. The avalanche hazard will be Low.





Forecast Weather Influences

Freezing level will remain above the summits. Light rain overnight, then becoming drier through the day. Strong to very strong West-South-West winds, backing to become South-Westerly in the early hours.

Comments

Thaw conditions set to continue through Tuesday. Becoming a little more wintry midweek, with freezing levels dropping below the summits.
