

### THE AVALANCHE HAZARD WILL BE MODERATE

#### Avalanche Hazard Forecast for Thursday 13/04/2023

##### Avalanche Problems

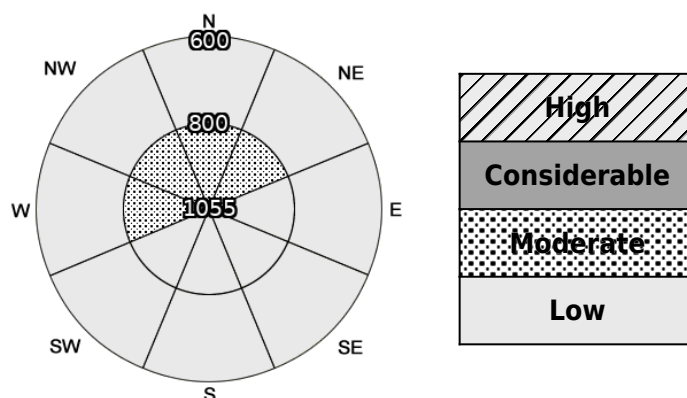

Wind Slab

Cornices

##### Forecast Snow Stability & Avalanche Hazard

Localised areas of unstable windslab will persist on North-West to North-East aspects and develop overnight on West aspects above around 800 metres. Fragile cornices will be present above these aspects. Aspects exposed to the wind will generally be scoured and stable. The avalanche hazard will be Moderate.

##### Forecast Weather Influences

Fresh Easterly winds overnight, ease in the morning and become light and variable in the afternoon. Showers will fall as snow above around 600 metres overnight and 800 metres during the day. The freezing level will be around 800 metres overnight, rising to 1000 metres during the day.

##### Comments

Lighter winds forecast for Friday with the temperature rising over the weekend.
