

Avalanche Hazard Forecast for Saturday 16/12/2023

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Currently there is insufficient snow cover to present any avalanche hazard, therefore avalanche reports will not be issued for this area. Refer to the Torridon Blog and Mountain Information for details which will be provided by SAIS forecasters on a daily basis.

Forecast Weather Influences

There will be South-Westerly summit gales or severe gales throughout. Rain at all levels, becoming heavy and persistent during the afternoon. The freezing level will remain well above the highest summits for the forecast period.

Comments

Expect significant rainfall across all mountains this weekend, combined with severe gales. It will remain very mild for this time of year.
