

Avalanche Hazard Forecast for Sunday 17/12/2023

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Currently there is insufficient snow cover to present any avalanche hazard and avalanche reports will not be issued for this area. Go to the Blogs and Mountain info for area photos; area info will be provided by SAIS forecasters on a daily basis.

Forecast Weather Influences

Storm force South-Westerly winds will continue, easing slightly after mid-day. Heavy rain expected during daylight hours. Freezing level way above the summits.

Comments

Colder air is expect from the North-West during Monday evening. The freezing level will drop to around 600m-800m bringing some snow showers to the West.
