

Avalanche Hazard Forecast for Sunday 17/12/2023

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Currently there is insufficient snow cover to present any avalanche hazard, therefore avalanche reports will not be issued for this area. Refer to the Torridon Blog and Mountain Information for details which will be provided by SAIS forecasters on a daily basis.

Forecast Weather Influences

Expect heavy and persistent rain at all levels throughout the period with the freezing level well above the highest tops. Severe South-West gales overnight will progressively moderate slightly through the day.

Comments

Amber weather warning issued for heavy persistent rain over the Torridon forecast area for tomorrow.
