

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 18/12/2023

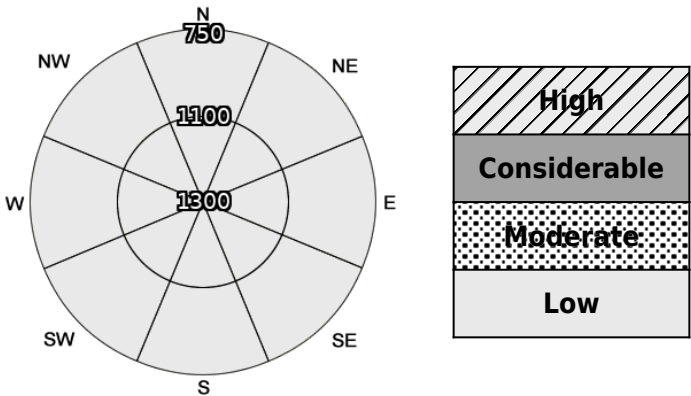

Avalanche Problems

Cornices

Forecast Snow Stability & Avalanche Hazard

The limited snowpack will continue to thaw at all altitudes and remain well bonded and stable throughout. The patchy snowpack will be most widespread around coire back walls and the plateau above 1100 metres. Cornice remnants will be prone to collapse. Rockfall will remain a potential hazard. The avalanche hazard will be Low.

Forecast Weather Influences

Strong to gale force South-Westerly winds. Mainly dry overnight, occasional showers falling as rain at all levels during the day. The freezing level will steadily fall to around summit levels by the end of the day.

Comments

Cooler conditions expected to arrive during Monday evening.
