

Avalanche Hazard Forecast for Monday 18/12/2023

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Currently there is insufficient snow cover to present any avalanche hazard, therefore avalanche reports will not be issued for this area. Refer to the Torridon Blog and Mountain Information for details which will be provided by SAIS forecasters on a daily basis.

Forecast Weather Influences

The rain will ease overnight, returning more showery in the afternoon with sleet and snow possible on the highest summits. Gale force Westerly winds expected again in the afternoon. The freezing level will lower to around 1000 metres by the end of the forecast period.

Comments

Refer to the Torridon Blog and Mountain Information.
