Southern Cairngorms

Avalanche Hazard Forecast

Issued 18/12/2023

FOR PERIOD 18:00HRS Mon 18/12/2023 TO 18:00HRS Tue 19/12/2023

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 19/12/2023

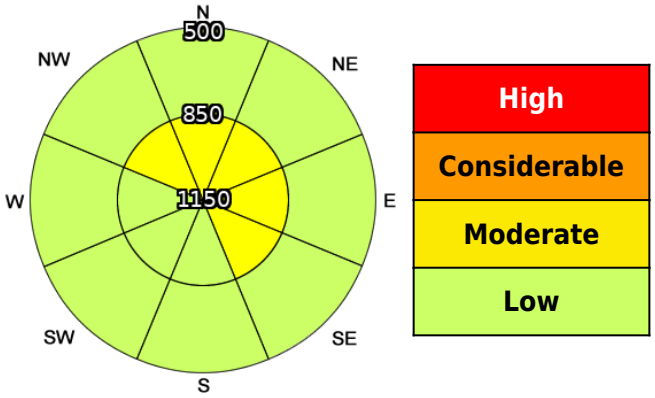

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

The patchy snow cover will become firmer with new isolated accumulations developing in a few steeper, wind sheltered locations mainly on North-East to South-East aspects above 900 metres. Corrie rims and sheltered terrain will be most affected but new deposits are not expected to become significant. Elsewhere, there will be a dusting of snow on bare ground. The avalanche hazard will be Low.

Forecast Weather Influences

Becoming cooler with light snow showers expected during the day above 700 metres. Winds will strengthen and veer during the morning, strong West-North-Westerlies during the afternoon.

Comments

Becoming cooler. New snow fall expected to be very light.
