

### Avalanche Hazard Forecast for Tuesday 19/12/2023

#### Avalanche Problems

#### Forecast Snow Stability & Avalanche Hazard

Currently there is insufficient snow cover to present any avalanche hazard, therefore avalanche reports will not be issued for this area. Refer to the Torridon Blog and Mountain Information for details which will be provided by SAIS forecasters on a daily basis.

#### Forecast Weather Influences

There will be gale force Westerly winds and showers, falling as snow above around 700 metres. The freezing level will be around 800 metres.

#### Comments

Isolated accumulations of fresh windslab will develop in wind sheltered locations. These will lie on bare ground and are not expected to be significant.
