Avalanche Hazard Forecast

Issued 19/12/2023

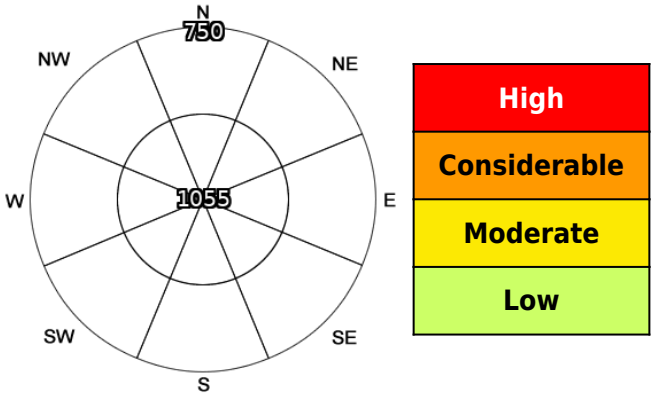

FOR PERIOD 18:00HRS Tue 19/12/2023 TO 18:00HRS Wed 20/12/2023

Avalanche Hazard Forecast for Wednesday 20/12/2023

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Currently there is insufficient snow cover to present any avalanche hazard, therefore avalanche reports will not be issued for this area. Refer to the Torridon Blog and Mountain Information for details which will be provided by SAIS forecasters on a daily basis.

Forecast Weather Influences

Strong Westerly winds. Showers falling as snow above around 750 metres overnight turn to heavier rain at all levels during the day as the freezing level rises above the summits.

Comments

A dusting of fresh snow overnight will consolidate and thaw as the temperature rises during the day.
