Avalanche Hazard Forecast

Issued 13/01/2024

FOR PERIOD 18:00HRS Sat 13/01/2024 TO 18:00HRS Sun 14/01/2024

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 14/01/2024

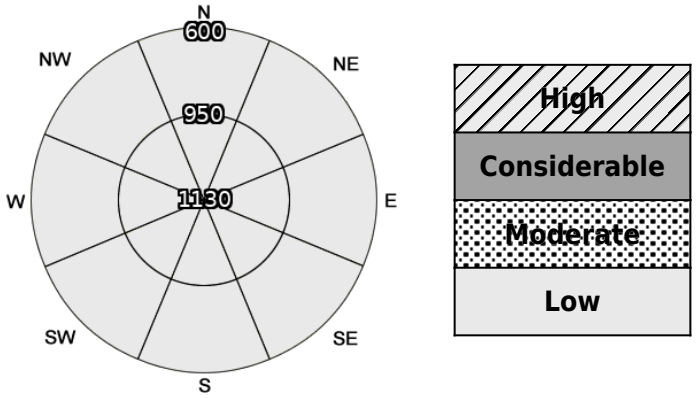

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Good stability in many places. Weaker windslab will begin to build on steep South-East to South-West aspects above 950m later. New wind drifted snow expected to be localized, thin and confined to coire rims and gully exits. The avalanche hazard will be Low

Forecast Weather Influences

Generally dry overnight then a few snow showers from the morning onwards. Progressively colder and freezing at all levels by the end of the day. Moderate North-Westerly winds strengthening and becoming more Northerly later.

Comments

Only limited new windslab anticipated.
