Avalanche Hazard Forecast

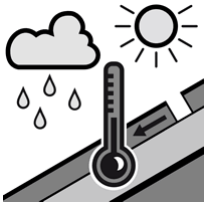

Issued 27/01/2024

FOR PERIOD 18:00HRS Sat 27/01/2024 TO 18:00HRS Sun 28/01/2024

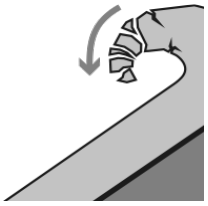

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 28/01/2024

Avalanche Problems

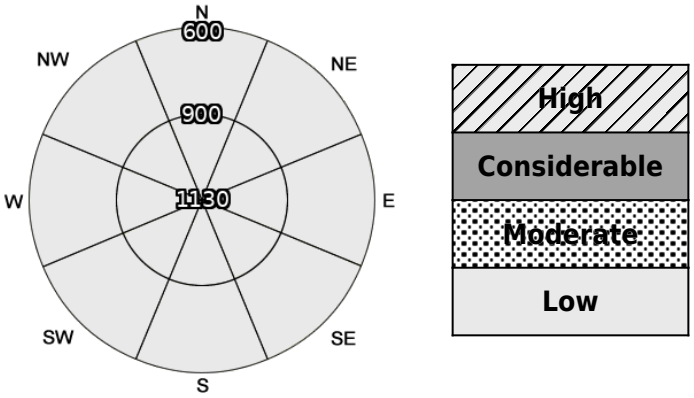

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to slowly consolidate and will generally be well bonded and stable. Isolated wet snow surface instabilities will be present mainly on very steep North through East to South-East aspects above 900 metres. Remaining cornices will be prone to collapse. The avalanche hazard will be Low.

Forecast Weather Influences

Gale force South-South-Westerly winds will increase to Storm force for a time during the day. Showers will fall as rain at all elevations, heaviest in the afternoon. The freezing level will be well above the summits.

Comments

Falling ice and rocks a hazard in the mild conditions.
Forecast to be much colder and less windy on Monday and Tuesday.
