Southern Cairngorms

Avalanche Hazard Forecast

Issued 02/02/2024

FOR PERIOD 18:00HRS Fri 02/02/2024 TO 18:00HRS Sat 03/02/2024

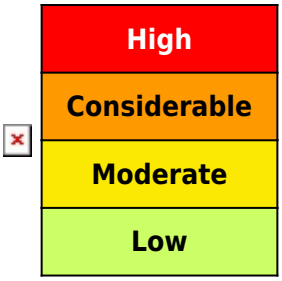

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 03/02/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

New snowfall will leave an insignificant dusting of snow above 800 metres. Older patchy snow will remain well bonded, becoming firmer and icy in some locations. Greatest cover will be found in North to East facing corries above 900 metres. The avalanche hazard will be Low.

Forecast Weather Influences

Becoming cooler with the freezing level dropping overnight to around 800 metres. Generally dry, only very light snow showers expected. Remaining very windy with strong to gale force winds from the West throughout.

Comments

Wet surface layers will start to become firm and icy as the freezing level lowers. Short run outs onto rocks are likely.
