

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 10/02/2024

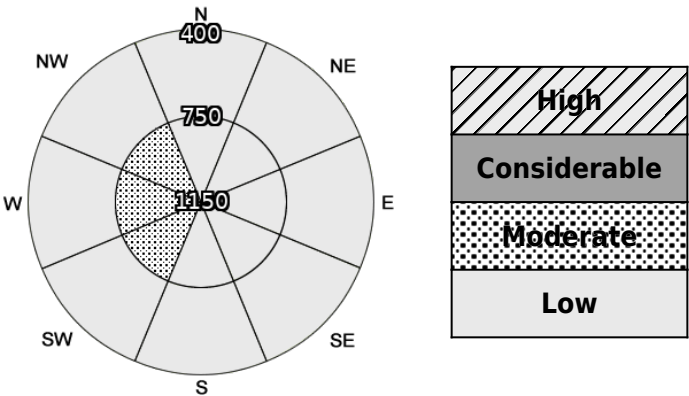

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Fresh unstable windslab will continue to form in wind sheltered locations mainly on South-West to North-West aspects above 750 metres. Accumulations will be localised and mostly falling on bare ground. The remaining old snowpack, on mainly North to East aspects above 750 metres, will be scoured, frozen and stable. The avalanche hazard will be Moderate.

Forecast Weather Influences

There will be snow this evening and overnight, though amounts are uncertain. Remaining mainly dry through the day, as the freezing level rises to around 800 metres. Initially gale force, the Easterly winds will steadily decrease overnight and throughout the period.
